

The Python Bible Volume 4: Machine Learning (Neural Networks, Tensorflow, Sklearn, SVM) (Paperback)

By Florian Dedov

Independently Published, United States, 2019. Paperback. Condition: New. Language: English. Brand new Book. MACHINE LEARNING WITH PYTHON! Machine Learning is probably the most important and fastest-growing industry in today's world. It's a much hyped term and nowadays it can be found almost everywhere. In robots, video games, the stock market, home appliances or even in cars. And it's constantly growing. The development of artificial intelligences can't be stopped and it bears almost unlimited potential (for both - good and evil). The people who don't educate themselves on this matter will be overrun by the development instead of benefiting from it. Python is definitely the language that dominates the AI market. Of course, artificial intelligences are developed in all sorts of languages but Python has become the lingua franca of machine learning in the past few years. Therefore, if you want to be part of this future, you will need to be fluent in Python and get a good understanding of machine learning. In this volume of The Python Bible series, we will dig deep into the machine learning realm and the Python language. We will train and apply complex machine learning models and at the end you will be able to develop and...

Reviews

Very beneficial to all of class of people. I am quite late in start reading this one, but better then never. You may like just how the writer create this publication.

-- Audra Klocko PhD

Thorough information! Its this type of great go through. It is amongst the most incredible publication i actually have read through. It is extremely difficult to leave it before concluding, once you begin to read the book.
